

ReadMe Document

This ReadMe document will help you with a quick navigation through the contents of the Pre-Reading material, Preview videos, Individual Labs and Mini-Hackathon/Hackathon for the upcoming session

Lecture Topics

1. Linear Classifier
2. Logistic Regression
3. Decision tree & Overfitting

Preview Videos

The Preview Videos Link for the respective sessions are available a week in advance (i.e. every Monday), to help you understand the concepts that will be covered in the upcoming lectures. There could be one or more videos depending on the lecture details. The video/videos should be viewed before attending the lecture for better understanding.

There are 1 preview videos for this session and they should be viewed as given below:

1. Decision Trees: This is a 6-minute video. This video will help you to understand how a decision tree works step by step.

Pre-Reading Material

The pre-reading material is given on (1) Decision Tree. You should read the material before you attend the lecture. This pre-reading will provide the gist of the lecture and facilitate your understanding during the lecture.

Reference Material

The Reference Material is given on Decision Tree

Individual Labs

1. Linear Classifier-Logistic Regression, Decision tree
